2024

Grow a greener life.

Welcome to our Capi Magazine!

Here we will share our latest collections, our story, and exciting news about our brand. Our team at Capi is proud to introduce our newest collection for this season, which features a touch of gold, but also new models and colours for both indoor and outdoor use. We believe that these pieces will add a touch of elegance to any living space or garden, while also showcasing our commitment to high-quality design.

But it's not just about our products - responsibility is at the heart of everything we do at Capi. From using recycled materials in our production processes to reducing our carbon footprint. We're dedicated to minimizing our impact on the environment. We believe that it's important to create products that not only look great but also have a positive impact on the world around us.

In addition to our story and new collection, we'll also be sharing more about our brand's history and mission. From our beginnings as a small business to our expansion into international markets. We're proud to share our story with you. To grow a greener life. Together!

Thank you for joining us on this journey.

Enjoy reading!

Grow a greener life. Together.

SHOW HOW IT'S DONE.

Big stories? We hear those often enough. So let's keep it short.

We are Capi, and we are working for a greener life for everyone; with everyone.

Sit back and wait for a better world? We don't do that. We put things in motion.

Whether our products are beautiful? You decide that for yourself. We'll take care of the rest. And with the rest we mean products of high and lasting quality: weatherproof, inspiring and with designs and colors for everyone.

With each of our pots fits a plant, garden, interior, terrace or balcony.

New life grows and blossoms from those pots. Let's make sure products no longer stand in the way of new life.

Capi pots are for a new generation; new life grows and blooms here.

Grow a **greener life.**
Together.

Scan this QR Code to check our **brand movie.**

'Grow a greener life' is more than words in a corporate mission statement. Taking care of the planet and each other is in our roots.

Certified **B** Corporation

Since 2023 Capi Europe is a proud B Corporation, which shows that one of the Company's goals is, to have a significantly positive impact on society and the environment at large.

For more information: www.bcorporation.net

CO2 Neutral Product

The Made in Holland collection is awarded the CO2 Neutral Product label. This can only be obtained as a result of serious environmental efforts.

CO2 Neutral Company

We also received a CO2-neutral certificate for the entire company. We reduce our own CO2 emissions and offset the remaining CO2 emissions.

PEFC certification

The planters in the Made in Holland collection contain wood fibres to give it a stone-look structure. This wood is PEFC certified.

Recyclass

The Waste collection is Recyclass certified, which proves that the material in the pots is actually made from recycled material. In our case 98,6%.

Taking responsibility.

Where it all started.

Behind the planters, there is a story that begins in 1997. Over 25 years ago, Toine van de Ven started a one-man business in Udenhout, the Netherlands.

Over the years, the product range changed from heavy concrete sculptures and ornaments to heavy Terrazzo planters. The planters were then replaced by lightweight Terrazzo-look planters to make them more user-friendly.

In 2014, this collection was enriched by the sustainable Made in Holland collection, along with the biggest change in Capi's history: the introduction of reshoring.

Toine would have never imagined that delivering heavy sculptures would become the preliminary stage for the Made in Holland products available today. Throughout more than 25 years, Toine has made several big changes, with reshoring being the largest one.

2020 was the year Capi Europe took a next step in the process of sustainability. We received the CO2 Neutral® Product and Company label (by Vinçotte), and we are very proud of it. Every pot from our Made in Holland collection is provided with this quality mark. We are able to do more than just recycling, because this is just a small part of being CO2-neutral.

In 2021 we were able to add a collection made from recycled materials. This collection is made from waste and includes; old fishing nets, used corks and recycled Capi planters.

These days honesty and certifications are very important to us. We do not only want to show, but also prove, how it's done! Since 2023 we also became a proud B Corporation and we are now part of the Business for good community.

It is not without reason our mission is: **'Grow a greener life. Together.'**

And this is just the beginning!

Made in Holland Production.

Capi Europe has developed its own CO2 neutral rotation moulding method for the production of Made in Holland pots. We are unique throughout the world in using this particular rotation moulding technique. With this process we save up to 80% of the energy compared to traditional rotation moulding.

01 Raw material

Mixture of polyethylene made with recycled material and PEFC certified wood fibres.

02 Big bags

The raw material hangs in big bags. Each big bag contains its own colour.

03 Filling system

The raw materials are automatically poured into the mould, using a filling system.

04 Own rotation moulding process

The mould is heated in order to melt and liquefy the powder. The machines spin around so the mixture is distributed throughout the mould. The substance is then cooled to produce the flower pot.

05 Orange inside

The two layers of the pot (outer layer and insulating layer) are made in a single cycle.

06 Moulds

Each pot model, texture, and size has its own mould.

07 Day & night

Our Capi robots work 24/7.

08 Mould to belt

As soon as the robot is finished, the pot will automatically be taken to the conveyor belt.

09 Conveyor belt

The conveyor belt takes the pot to the finishing robot.

10 QR code

Our first finishing robot takes the planter off the belt and makes sure the QR code on the bottom is visible to scan. After scanning the pot will be placed in front of the second finishing robot.

11 Finishing robot

The sharp edges will be removed by our second finishing robot in order to finish the pot.

No waste! 12

The edges coming of the pot will be thrown into our own shredder. This means there is no waste during our whole production process.

13 Back to the roots

The material coming from our shredder goes back to our supplier. There they will be used for new materials.

Scan this QR Code to check our production infographic.

Capi HQ in Tilburg.

At the end of 2017, Capi moved to a brand new building in Tilburg. The company is now twice as large and occupies an area of over 38.000 m². We have 6.716 solar panels on our roof providing electricity for our headquarters. The energy generated by this amount of solar panels equals electricity for around 1.400 household.

We also have our own 2.000 M² Experience Centre, our own warehouse with more than 20.000 pallet locations and even a 'green' parking lot...

Would you like to visit us? You are always welcome!

The style of Nicole **@nieks_servies.**

'About four years ago, I met Capi Europe through their light-weight outdoor flower pots. I love gardening and I also enjoy potted plants, mostly tropical plants. As these need to be moved to a suitable place for them to survive the winter, we often had to carry plants in heavy pots. Since we were introduced to the Capi pots, that's a thing of the past.

Besides being conveniently lightweight, the pots also have beautiful shapes, colours and structures. What makes Capi special to me is that they are very much into sustainability, as we did when renovating our own house. Add to that their innovative products like the pots made of wine corks and fishing nets. Someone else's waste now shines in our homes and gardens through a beautiful pot. By now, we have a sizeable collection of Capi products in our home and garden from outdoor pots, indoor pots, watering cans and an insect hotel.'

Follow Nicole on Instagram: **@nieks_servies**

Rib Vase Elegant Deluxe Ivory.

This Ivory Rib pot is my favourite pot because its height and shape make it an instant eye-catcher in your home or garden. The advantage is that the pots can be used both indoor and outdoor and have a frost-resistant inner layer.

Indoor pots Groove.

A beautiful range of indoor pots. I chose the colour gold with the black grooves, which gives the pots a fancy look. A nice set of different sizes and shapes of the groove pots together gives a cosy playful effect.

Insect hotel/bird house.

Beautiful design and it's fun to take good care of our nature and the animals. We had a little bird visiting us in our garden for the first time last year!

The orange interior.

Our well-known Made in Holland pots all feature an orange interior. This is for several reasons. Read why here!

Insulating layer for plants.

The orange inside is actually a second layer that acts as an insulation layer. It protects the plant's roots against frost in winter and heat in summer.

Filling tip.

1. Choose an impressive plant.
2. Fill the planter for 1/3 with hydro grains.
3. Fill the planter for 2/3 with soil.
4. Put your impressive plant in the soil.
5. Enjoy the growth.

Outdoor use? Please drill a 25mm hole to ensure water drainage and place our drainage cap on top (see page 67).

Made in Holland.

The pots with the orange interior are all made in Tilburg (NL). Orange is of course a symbol of the Netherlands, look for instance at the shirts of the Dutch national team. Worldwide, the colour orange represents the Netherlands.

The symbol for reshoring.

For various reasons, we brought production back to the Netherlands 10 years ago. A difficult word for this is reshoring. To recognize the Dutch pots, they were therefore given an orange interior.

Extra strength.

The orange layer also makes the pot extra strong. And that, in turn, makes it fracture-resistant.

Outdoor

For outdoor use, please drill a 25mm hole to ensure water drainage.

Indoor

The planters are perfect for indoor use, because they are 100% watertight.

NEW

The golden touch.

Introducing our new collection of golden pots, expanding our popular Groove **NL**, Rib **NL** and Clay **NL** designs. These pots have been designed to add a touch of glamour and elegance to your interior, making them true eye-catchers that are sure to impress.

The addition of the golden color to our Clay, Rib, and Groove pots brings a sense of luxury to any room. The shimmering golden finish adds a warm and radiant glow. Whether you have a modern or traditional interior, these golden pots effortlessly blend in.

But these pots aren't just limited to indoor use. By drilling a hole in the bottom, they can also become a perfect addition to your outdoor area. The high quality of the pots makes them perfect for various weather conditions, so you can enjoy their beauty both indoor and outdoor.

The pots can be used for a wide variety of plants, from vibrant flowers

to lush greenery. The contrast between the golden surface and the natural colors of the plants creates a striking combination, making your plants truly stand out.

Just like the rest of our Made in Holland collection these golden pots are CO2 neutral produced and come with a lifetime warranty. We believe in creating products that not only enhance your living spaces but also contribute to a greener future.

You can find all gold models and textures on the next page.

Grow a greener life. Together.

CO2 neutral Made in Holland.

Nature as a source of inspiration. With its green leaves and shades, many textures and energy. Our Made in Holland collection is based on these elements. Each texture forms a unique, coherent flow within our collection.

The Capi Made in Holland is produced completely CO2 neutral in our factory in Tilburg. Because of our own production process, we are able to manufacture lightweight flower pots, which are 100% recyclable and come with a lifetime warranty.

The orange interior is intended to represent their place of origin and has become a recognisable feature of our brand.

The orange layer also provides the planters with insulation, offering your plants extra protection against both heat and cold. This extra layer provides extra firmness to the planter, which makes it fracture-resistant.

Check out page 16-17 to read more about the orange interior. You can also find some useful filling tips for our planters on these pages!

The pots have a robust look, but they are extremely **lightweight** which makes them easy in use.

Nature Groove NL

This year our Groove texture is also available in our Made in Holland collection. Our new Groove is, just like the rest of these collections, CO2 neutrally produced in the Netherlands. And of course they have our signature orange inside which is also an insulating layer, offering your plants extra protection against both heat and cold. Available in 4 colours.

98%

**RECYCLED
PLASTIC**

Certified by RecyClass

This collection is for 98,6%
made from recycled materials.

Pictured: Waste Planter Ball Rib Beige KTBR932 & KTBR933

This collection takes action & responsibility.

We turn these fishing nets combined with used old corks and recycled Capi planters into high quality products with a functional design. Just like the rest of our Made in Holland collections these pots are made CO2 neutrally in our factory in Holland and come with a lifetime warranty. They are available in a dark grey colour and a bright beige colour. Both suitable for indoor and outdoor use.

This collection takes action and responsibility by taking on one of the biggest waste problems today, preventing fishing nets to be thrown into the ocean. The fishing nets in our Waste collection are collected from harbours and larger fisheries to prevent them from ending up in landfill or in the ocean. The company Plastix from Denmark recycles this maritime plastic into raw material that we use for this collection. The nets mainly come from Europe (>90%), but they are also collected in other parts of the world.

For the cork we work with the French company Vinventions, that makes synthetic corks and screwcaps for wine bottles. They have a cork recycling program and the used corks are purchased by our supplier and transformed into raw material. The proceeds from this go to associations such as cancer funds.

The old Capi planters come from our own factory. When finishing our Made in Holland pots we remove the sharp edges. These orange edges

go through our shredder and are then returned to our supplier, where they are again transformed into raw material. The combination of all previously mentioned raw materials is used for our waste collection.

For this collection we skipped our iconic orange interior of the planters to keep the recycled look on the inside as well. This makes the story even stronger because the planters look recycled all over.

This collection is 98,6% Recyclclass certified, showing that this collection actually consists of recycled materials. In our case by 98.6%! RecyClass is a party that checks and certifies the recyclability of plastics in the European market. After all, does a product actually consist of what it says? Capi wanted to proof that what we say about the recycled materials in this collection is true. That's where we called in Recyclass. What about the other 1,4%? These are additives to bind the materials and to give the pots the consistent colour they have.

Arc Granite
COLLECTION.

This collection contains XL planters up to 177cm wide!

Pictured: Vase Ball Anthracite NATS8053, NATS8054 & NATS8055

Elevate your outdoor spaces.

Introducing the inspiring Arc Granite collection, a series of eye-catching models with sizes ranging from XS to XXL (up to 177cm). This collection is perfect for projects, entrances, and any outdoor area where you desire a touch of brilliance.

The Arc Granite collection is inspired by contemporary architecture. This collection is a combination of nature and extreme luxury. A playful collection which comes in XS up to XL sizes (up to 177cm!) that can be used indoor & outdoor. Perfect for big venues or as a real eyecatcher in your home and/or garden.

The planters are 100% watertight and therefore suitable for indoor use. Would you like to use the planters outdoors? You only have to drill some drainage holes of 25mm in the bottom to make sure the water can find its way out of the planter. Because of the smooth material the planters are easy to clean, which makes them usable for outdoor in all weather conditions. You can even use these planters as a small pond.

The rich texture and natural grain of the granite finish create a striking contrast against the lush greenery, adding depth and character to your outdoor spaces. Whether you're looking to create a stunning entrance or enhance a large-scale project, the Arc Granite collection offers a wide range for several spaces.

Crafted with durability in mind, these planters are built to withstand various weather conditions. Their high-quality ensures a long lifespan, making them a reliable choice for indoor & outdoor.

Available in three colours: Anthracite, Ivory and Black (new).

Capi

ACCESSORIES.

Catch rainwater when it falls.

The climate is changing and the weather is becoming more extreme. There are more days with heavy and prolonged rainfall. And at the same time, there are more periods of sustained heat and drought. This has many adverse consequences. To help maintain a water friendly garden, Capi has developed several design rain barrels.

In today's world, where climate change has led to erratic weather patterns and increasing heat, the problem of rainwater runoff and heat build-up in urban areas has become a significant issue. Excessive rainwater runoff not only contributes to flooding but also exacerbates the urban heat island effect, making outdoor spaces uncomfortable and less sustainable.

Fortunately, Capi Europe rain barrels offer an effective solution to this problem. By collecting rainwater from rooftops, this precious resource can be stored and utilized for your garden's irrigation needs. You can nourish your plants with this natural resource, reducing the need for tap water consumption. This not only saves money on water bills but also minimizes the strain on local water supplies.

The Capi Europe rain barrels are available in a variety of sizes, ensuring that you can find the perfect fit for your needs. Whether you have a small garden or a larger outdoor space, there's a rain barrel that suits your requirements. Additionally, the two different textures available allow you to choose a design that complements your aesthetic preferences and seamlessly integrates into your garden.

All rain barrels come with a planter on top. This way you can also add some extra green to your garden.

Tip: fill the planter on top with some flowers that attract birds, bees or butterflies to boost the biodiversity in your garden.

NEW

Warranty

Just as our Made in Holland collection, our rain barrels come with a **lifetime warranty**. The barrels are very sturdy, weather resistant and can hold a lot of water. The accessories of the rain barrel come with a 5 year warranty and can be replaced easily without moving the rain barrel.

LIFETIME WARRANTY **5 YEAR WARRANTY**

Available in two textures:

Rib Black

Groove Black

All our rain barrels are provided with a **luxurious metal tap** including garden hose connection!

Our rain barrels come with a **planter** on top.

Rain barrels

Introducing the Capi rain barrels with two captivating textures: Rib and Groove (new). The new Groove texture adds a unique touch, featuring stylish grooves that create a visually appealing and contemporary look. The Rib texture remains very classic and has a slightly more natural look. Both textures are available in different models.

Contribute to biodiversity.

Discover the Biodiversity Collection by Capi Europe, a range of bird- & insect houses designed to support biodiversity in your garden or outdoor space. Available in two shapes, oval and hive, and two earthy colors, brown and anthracite. These houses seamlessly blend into natural surroundings while providing a safe haven for various species.

The gardens all around the world are slower consisting more and more of stone. And that's a shame, because insects and birds have less space to do what they are made for. Because a green lifestyle is very important for a lot of people and to help the animals, Capi Europe has designed the biodiversity collection.

The Biodiversity Collection features a variety of houses, including birdhouses, butterfly houses, and bee hotels, each tailored to attract specific creatures. From providing nesting sites for birds to creating habitats for butterflies and essential pollinators like bees, these houses play a vital role in supporting biodiversity.

The oval models have a natural shape so they fit in every garden. The Hive

models have a modern geometric design, including a **click & combine** clip on the back. With this clip you can easily click several bird- or insecthouses from this collection together. This way you can create a full biodiversity wall or some bird villa's in your garden!

This collection is made from recycled materials and doesn't have a packing, but only an information sticker. This way we provide all the information needed, but we save on material that we throw away after purchase. Both the Hive and the Oval bird- and insecthouses can stand on their own in the shelves for a full biodiversity shelf plan.

Grow a greener life. Together.

5 YEAR WARRANTY

Available in two shapes and two colours:

A Anthracite B Brown

The bird houses attracts different bird species, for example:

Bird house 1		Bird house 2
Blue Tit *	Nuthatch *	Common redstart
Pied Flycatcher	House Sparrow *	Pied flycatcher
Crested Tit	Tree Sparrow	Starling
Great Tit		Tree sparrow *

 * This bird eats the oak processionary caterpillar.

Based on European bird species.

Scan this QR Code for more info about our biodiversity collection.

Biodiversity Oval & Hive

The Capi Europe Biodiversity collection is available in two different shapes (Oval & Hive) and two beautiful colours: Anthracite & Brown. This way they will fit in every garden. With this collection you will be able to make a contribution to nature.

This collection is made from 100% recycled materials.

Pots made with recycled materials.

Revolutionize your indoor decor with the new Capi Indoor Collection, a range of pots that combines stunning design with eco-conscious manufacturing. Crafted through injection moulding, these pots are not only visually striking but also made from recycled materials, embodying a commitment to sustainability.

This new Indoor Collection features pots made with textiles, artificial grass or sawdust. Each pot tells a story of repurposing and transforming one of these residuals into something beautiful.

All pots are made with recycled materials, but to decide its colour a specific residual will be added. The black pots are made with old textile. For green the artificial grass of old sport fields has been used, which also combines a piece of vitality into this colour. For the off-white colour sawdust is added. This way each colour has its own story.

Available in three different sizes, these pots are suitable for different

plants and spaces, providing endless possibilities for adding green in your home or office. Additionally, this collection comes with a lifetime warranty, ensuring the quality and long lifespan.

By choosing this collection, you not only enhance your indoor spaces but also contribute to the reduction of waste. These pots serve as a powerful reminder that taking care is not that hard.

Prefer using these pots outside? No problem. Just drill a drainage hole in the bottom so you can decorate your balcony or outside tables.

Grow a greener life. Together.

We add the colours.

Add a splash of vibrant colours to your interior with the Capi Groove Collection. With its wide range of six different colours, this collection offers a delightful opportunity to bring personality and liveliness into your space. Whether you prefer a pop of merlot red, a stunning dark blue, or a natural green, the Capi Groove Collection has a shade to match your style.

Choose from three different models within the collection, each designed with distinctive grooves that add texture and visual interest to your decor. These pots are not only a practical way to showcase your favorite plants but also serve as stunning decorative accents that elevate the ambiance of any room.

With the Capi Groove Collection, you can unleash your creativity and create a space that reflects your unique personality and style. Whether you're looking to introduce a subtle accent or make a bold statement, these pots provide a fantastic way to infuse your interior with vibrant colors that bring joy and energy to your surroundings.

Groove Colours

The Groove Colours collection combines a natural touch with remarkable colours. This way a colourful and extraordinary look has been added in our collection. Pick your favourite colour or mix and match them all together.

The Groove collection is, as the name says, inspired by grooves. From the vertical grooves in rocks and mountains that arise from natural changes occurring over the years.

OUTDOOR
COLLECTION.

Pictured: Planter Tapered Terrazzo Black FIT912

Planters that match with every style.

Elevate your outdoor space with the classic Capi Lux Outdoor Collection, a range of planters crafted from terrazzo. With its elegant look, this collection effortlessly combines timeless design with durability, creating a stunning addition to any garden.

The Capi Lux Collection combines the durability of terrazzo with a refined design, creating pots that are not only visually stunning but also built to last. The smooth, polished finish and intricate texture of the terrazzo surface add a touch of opulence to your decor, elevating your space to new heights of elegance.

Available in Black, as well as select models in White, these planters create a striking contrast against the lush greenery, turning your outdoor area into a visual masterpiece.

Not only does the Capi Lux Outdoor Collection offer stunning aesthetics, but it also ensures long-lasting performance. The terrazzo material is known for its exceptional durability, making these planters suitable for all weather conditions. Whether it's rain, sun, or frost, these planters will maintain their beauty and withstand the test of time.

With its elegant design and durable construction, this Capi Lux Outdoor Collection will captivate your senses and add a touch of luxury to your outdoor oasis.

Shelf plans in your store.

For our customers we can provide customised shelf, floor, and store plans. Thanks to our experience and product knowledge we can help you with the best product presentations in your store.

Please contact us for the options in your store.

Indoor & Outdoor shelf plans

For our indoor & outdoor collection we advise shelf plans, floor plans, or a combination of these two. We combine this with our Point of Sales materials and customised signing. This way you can provide the right information to your customers together with inspiration through lifestyle images. Indoor & Outdoor is also easy to combine with our Rain barrels and Biodiversity collection for even more garden inspiration.

Indoor shelf plans

Capi Europe provides shelf plans to make sure our products are presented in the best way in your store. We create these plans per shelf or we can create a full indoor wall you can use. To make the best experience we add customized signing above the shelves to inspire the consumer through lifestyle images.

Capi corner

To help you setting up the perfect Capi corner in your garden centre we can create a store plan together. We will combine shelf plans and floor presentations with pot-plant corners to create a full Capi Experience. Together with our lifestyle images and POS material the consumer will see the perfect balance between information and inspiration. The combination of our indoor & outdoor collection, our rain barrels and biodiversity products together with plant tables ensure a green oasis in your store.

Grow a **greener life.**

We can help you create the best presentations in your store.
Please contact us for the options in your store.

Displays & mix boxes.

To assist our customers to present the Capi accessoires, we developed displays and POS materials for a practical and suitable presentation.

Warranty & service.

Every single Capi product comes with a warranty. Our Made in Holland collection comes with a **lifetime warranty** on manufacturing defects when the products are being used properly. We are proud to offer a lifetime warranty on these products to show you that we believe in the quality and long lifespan of our products. We live in a consumer society where we of course want to sell as many pots as we can. But we don't want people to buy a pot and just use it for a few years to throw it away afterwards to buy a new one. We would like to make sustainable design pots that lasts a lifetime!

The rest of our collection comes with a **5 or 10 year warranty** on manufacturing defects. These warranty rules only apply when the products are being used properly.

If anything happens to a Capi product when it is in use, or when a customer comes back with a complaint about a product, please do not hesitate to contact our service department. We are happy to help you. Please visit capi-europe.com/en/guarantee/, fill out the form and we will make sure you will be assisted as soon as possible.

It will be very helpful if you would describe and attach the following:

- Description of the complaint.
- Type of product and size.
- Photos of the product and their defect.
- Purchase receipt.

Our warranty rules apply when our products are being used properly.

There are some thing to take in mind when using a planter;

· Planters need a drainage hole when being used outdoors. This allows the roots of the plants to breathe and it makes sure the water can drain off. This drainage hole also makes the planter frost-resistant. In addition, it is important that the pot is kept off the ground in frosty conditions. If the pot has a flat bottom, it can be placed on pot feet or a trolley.

· Make sure the drainage hole is at least 25mm, otherwise it may be clogged by the hydro grains in the pot. If the pot doesn't have enough drainage, the plant will be standing in too much water for too long (and the pot won't be frost-resistant). Poor drainage can also cause calcification on the outside of the pot. This is easy to clean, but even easier to prevent with a good drainage.

· When the pot is filled, it is less easy to move it because of its weight. Therefore, find a suitable spot in advance. If you do want to move the pot (e.g. because plants have to go inside during the winter), preferably use a trolley or lift the pot at the

bottom with two people. Do not lift the pot by the edges, but at the bottom. The edges are no longer fracture-resistant when the pot is fully filled, because of the weight.

· Not all plants are suitable for pots. Our pots are only fracture-resistant if the potted plants and their roots remain in proportion. Plants with fast-growing roots, create increasing pressure and are not suitable for placing in flower pots. These include tree species, fast-growing plants and, for example, bamboo. These plants are mainly suitable for placing in the ground. If you want to put them in a nice pot, make sure you regularly repot them to a larger pot. If in doubt, always contact our service department or ask for advice in the garden center.

· Make sure the plants are in proportion with the planter you place them in. If the plant is too big or too high the plants probably do not have enough space to grow, and the pot probably can't hold the plant, in gusts of wind for example, because the pot

is not heavy enough to stay upright.

· A flowerpot can always get dirty, especially if it is outside. The flower pots can easily be cleaned with a soft brush or cloth, possibly with some warm water and a little detergent. For shiny flower pots, preferably use a soft cloth to avoid scratches. Do not use high-pressure cleaners, caustic/abrasive products or products with chlorine/ other bleaching agents.

Feel free to contact our service department if you have any questions.

Happy to help!

Cheers.
Tschüss.
Salut.
Houdoe.
